

## Compiler answer 😊

### 1)how to import large file by bench command frappe?

```
bench --site [your-site-name] execute  
frappe.core.doctype.data_import.importer.upload via_console --args  
"file_path='private/files/[your-file-name]'"
```

### 2)how to make system translation instead of using the translation list by bench command frappe?

```
bench --site [your-site-name] execute frappe.translate.bulk.translate_all  
or maybe bench import-csv
```
